RE: West Hartford Water Treatment Facility – Tree Removal – Pedestrian Safety

Dear Resident/Property Owner:

Beginning this month, the Metropolitan District (MDC) and its contractors will perform limited tree removal at the West Hartford Water Treatment Facility, located off Farmington Avenue in West Hartford. The trees being removed are those that are dead, in serious health decline due to insect infestations, damage caused by recent storms, or those whose root systems could be directly influencing the pipelines themselves. This work is necessary to protect the water supply infrastructure, and for recreation users as well.

Please see the attached map illustrating areas planned for tree removal. All work will occur within MDC property. While the work is being performed, residents will still be able to access the West Hartford Reservoirs through the main entrance on Farmington Avenue. However, the areas indicated on the map will be closed during work hours. Included in the work area is a section of the Red Road / Loop south of Reservoir No. 3.

For your safety, and that of your neighbors, please abide by any closure signs that may be posted during the duration of this project. Because entry into this area may be dangerous, anyone ignoring the closure signs will be subject to fines and/or arrest. We anticipate the work to take 4 to 6 weeks, however weather conditions and other factors may extend the duration.

While the MDC regrets any inconvenience this temporary closure may cause, this action is necessary to ensure the safety and security of all our recreational users during the work.

If you have any questions please do not hesitate to contact me at the MDC Command Center at (860) 278-7850, ext. 3600.

Thank you for your patience and cooperation.

Sincerely,

Jeremy Galeota
Project Manager
